

Green Hydrogen. Mint Stations.

About Mint Hydrogen

With a customer-centric approach and state-of-the-art technology, we are building a reliable hydrogen infrastructure to contribute to the transformation towards zero-emission transportation. Our network of filling stations across Europe will be supplied exclusively with green hydrogen. This will provide drivers of passenger cars, light and heavy-duty vehicles, and buses with a sustainable energy source.

What we **strive** for

Our goal is to build a transnational network of reliable filling stations to meet the demand for zero-emission mobility and to promote hydrogen as the energy source of the future. Through strong partnerships, we are setting new standards and advancing the hydrogen economy.

Mission

Green Ecosystem

Building a reliable hydrogen refueling infrastructure as a contribution to the transformation towards a world based on green energy.

Vision

Hydrogen for Transport

To provide widespread access to a sustainable, reliable, and practical source of energy for the transportation of people and goods.

Target

Reliable Infrastructure

A nationwide network of hydrogen refueling stations through the iterative development of regional clusters for local and long-distance transportation.

Why to choose our stations

To meet the individual needs of our partners, we offer a variety of filling station concepts.

Green Hydrogen

Our stations will only provide hydrogen produced from renewable energy.

350 and 700 Bar

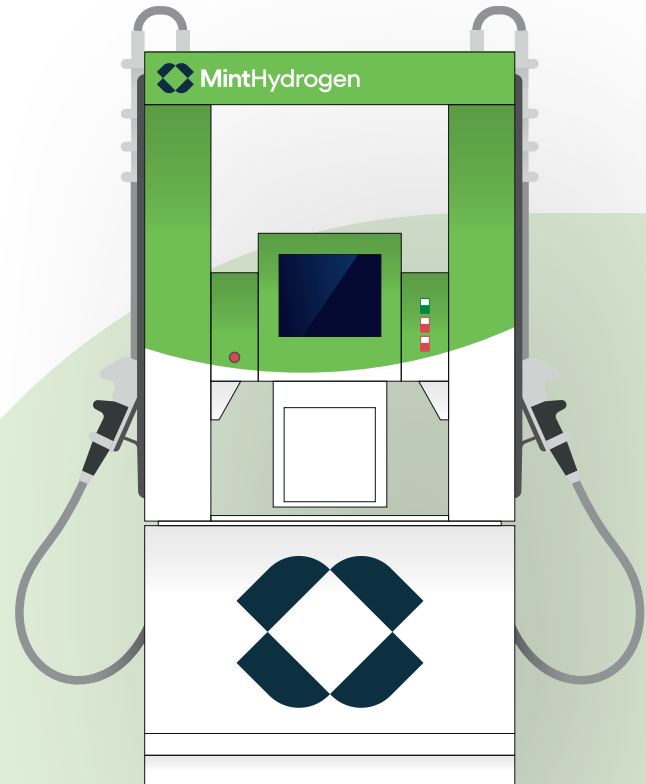

Our stations will provide both pressure solutions to supply all vehicles.

Quick Refueling

Fuel up to 30 kg in minutes with advanced filling station technology.

Find out more
about our stations.

Drive Anywhere. Fuel Sustainably.

Paying at filling stations has never been so easy.
Enhance mobility with our Hydrogen Fleet Card.

One Card for All Stations

Pay conveniently and contactless.

Smart Fleet Portal

Manage payments and card holders.

Attractive Conditions

Special offers and additional services.

Hydrogen Availability

Easily monitor the status of your preferred stations with alerts.

Available April 2024
